(54) LIGHT-EMITTING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a light-emitting device whose life as a commercial product can be extended by forming fluorescent materials which rapidly deteriorate and a resin containing the fluorescent materials into an exchangeable structure.

SOLUTION: The light-emitting device is provided with light-emitting elements 2 placed on a mount board 1 and fluorescent members 3 which are excited by the light emitted by the light-emitting elements 2 and emit light with a wavelength different from the excitation wavelength. The fluorescent members 3 are exchangeable.

LEGAL STATUS

[Date of request for examination]

20.05.2005

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]
